

# House 2014

# Changes to Contractor Performance Evaluations

**Rosemary Gilbertson, PE**

**Deputy Chief, Engineering Division**

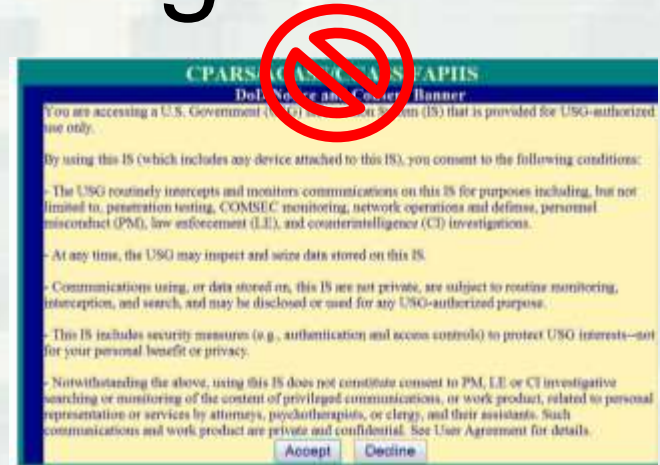

**Louisville District**

**29 Jan 14**

# What Will Change

- Historically, CPARS, ACASS, and CCASS contained differing contractor evaluation forms, rating elements, and workflow processes.
- The CPARS, ACASS, and CCASS modules are being merged into a single application under the CPARS name.
- The merge includes the transition to a common evaluation form with a common set of rating elements in addition to a transition to a common workflow process

# Why the Change?

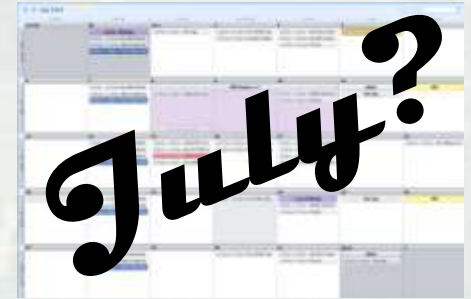

- Implements one of the Government Accountability Office (GAO) recommendations in audit GAO-09-374 “Federal Contractors: Better Performance Information Needed to Support Agency Contract Award Decisions” dated April 23, 2009.
- GAO recommendation: standardize evaluation factors and rating scales government-wide.
- Designed to promote system usability by simplifying the evaluation process.
- End result: streamlined and optimized system.
- The merge is a prerequisite to the merging of CPARS and the Past Performance Information Retrieval System (PPIRS).

# When it Will Happen

- CPARS Program Management Office (PMO) is planning to release the merged CPARS application in Q3 FY14
- Starting 6 months prior to the release, users will begin receiving emails every two weeks notifying them of the upcoming “brownout period” and urging them to complete any in process CPARs prior to the release.
- 60 days prior to the release, those notices will increase in frequency and will occur weekly.
- The final month prior to the release has been identified as the “brownout period” where no new evaluations may be started.

# What to Expect

- Evaluations that are not completed will be re-statused to the INITIATED or DRAFTED status.
- During the merge, data in deleted fields will be lost, new data fields will be blank, ratings and narratives will be removed, and data in changed data fields will be preserved to the maximum extent possible for all evaluations not completed prior to the merge.
- An unusually high volume of evaluations to review from now to June 2014

# What to Expect - (cont'd)

- No changes to existing data will occur for completed evaluations.
- PPIRS will maintain all **completed** evaluations as they were written in CPARS, ACASS, or CCASS and no data loss will occur. All evaluations completed after the merge will appear in PPIRS under the new evaluation form for the required retention period.
- New guidance from PMO at approximately the time of merge

SAMPLE

# MAJOR CHANGES

- Common Rating Elements have been implemented. They are:
  - ▶ Quality
  - ▶ Schedule
  - ▶ Cost Control
  - ▶ Management
  - ▶ Utilization of Small Business
  - ▶ Regulatory Compliance
  - ▶ Other Evaluation Area 1
  - ▶ Other Evaluation Area 2
  - ▶ Other Evaluation Area 3

# MAJOR CHANGES – (cont'd)

- The DD2631 (ACASS) and the DD2626 (CCASS) are being removed.
- The PDF version of the evaluation is being removed.
- The interface to the Resident Management System is being removed.

# MAJOR CHANGES – (cont'd)

- Architect-Engineer and Construction contracts will be evaluated on an annual basis. Evaluation due dates and reminder emails will be calculated on an annual basis for these contracts.
- All evaluations, including Architect-Engineer and Construction, will be archived from CPARS three years following contract completion.

# OTHER CHANGES

- Data elements are being revised; fields for Project Title and Complexity are being added.
- The “Improving Communication” question asked of Assessing Officials and Contractor Representatives is being removed.

# OTHER CHANGES – (cont'd)

- The terms “Rating Official” and “Evaluating Official” are being changed to “Reviewing Official.”
- The Reviewing Official will be optional for Architect-Engineer and Construction evaluations. A Reviewing Official will only be required in the event that the Contractor Representative does not concur with the evaluation.

# REPORTING REQUIREMENTS

- Completed Architect & Engineering and Construction evaluations will no longer overwrite previously completed evaluations.
- Retentions in PPIRS will remain the same at six years from the contract completion date.

# CONTRACTOR REPRESENTATIVE CHANGES

- **Will I still get 30 days to respond to the evaluation?**

Yes, per regulation, you are entitled to a 30 review/respond period. However, it is possible that your evaluation could be submitted to the Contractor Rep with less than 30 days remaining until the merge date. In the event this happens and you need a full 30 days to comment on the evaluation, it is recommend leaving the evaluation open, let it revert to the Assessing Official post merge, and let the Assessing Official re-process it in the merged system.

- **What will happen to my comments if the evaluation is not completed before the merge date?**

If you enter comments into your evaluation and that evaluation is not completed before the merge date, the evaluation will be returned to the Initiated (with the AOR) or Drafted status (with the AO), and all comments entered after that status will be removed. In the merged system, the Assessing Official will then have to re-process the evaluation where you will be given the opportunity to respond to the evaluation again.

- **Will my company's evaluation still be available in PPIRS?**

All completed evaluations will remain in PPIRS as they were originally written in CPARS, ACASS, or CCASS and no data loss will occur. At the time of merge, in-process evaluations will not be transferred to PPIRS until they are completed post merge. All evaluations completed after the merged system will also be transferred to PPIRS with the new CPARS form.

# For More Information

**CPARS** Contractor Performance Assessment Reporting System

Home | Access Forms | Contacts | FAQs | Guidance | Release History | Related Links | System Requirements | Training

**SPECIAL NOTICE for Contingency Environment Users (Iraq, Afghanistan, etc):** The CPARS Team is committed to expediting assistance to users supporting contingency operations. When making an outreach for customer support or training, whether via email, phone call, or leaving a voice message, please identify that you are a contingency environment user and your request will be expedited accordingly.

 CPARS hosts a suite of web-enabled applications that are used to document contractor and grantee performance information that is required by Federal Regulations.

FAR Part 42 identifies requirements for documenting contractor performance assessments and evaluations for systems, non-systems, architect-engineer, and construction acquisitions. FAR Part 42 also requires documenting additional contractor performance information in the Federal Awardee Performance & Integrity Information System (FAPIS), including Terminations for Cause or Default, DoD Determination of Contractor Fault and Defective Cost or Pricing Data and to make the information available in the Past Performance Information Retrieval System (PPIRS).

FAR Part 9 identifies requirements for Contracting Officers to enter Determinations of Non-Responsibility in FAPIS. The Grant Community is also required to utilize FAPIS to document Terminations for Material Failure to Comply and Recipient Not Qualified Determinations.

The CPARS applications are designed for UNCLASSIFIED use only. Classified information is not to be entered into these applications.

## FY14 Total Louisville District Civil Works Program

# Civil Works Program...*Navigation*

## ■ Olmsted L&D

- ▶ Twin Lock Chambers construction is complete
- ▶ Dam construction is underway
  - Tainter Gates:
    - 16 of 18 shells set; final 2 set in 2014.
    - 1<sup>st</sup> tainter gate installed in 2014.
  - NavPass:
    - Foundation prep is on-going.
    - Fabricate & set first shell in late 2014.

## ■ Olmsted Lock Renovations

- ▶ Major Lock Rehab award Mar 2014
- ▶ Aux. Maint. Bulkheads award in Feb 2014

# Civil Works Program...*Navigation*

- JT Myers Lock Extension
  - ▶ The ARRA upper bank approach widening is complete.
  - ▶ Resident Engineer's Building is complete.
  - ▶ Remaining design & construction are dependent upon future appropriations.
  - ▶ Possible reevaluation study

# Civil Works Program...*Navigation*

- Green & Barren Rivers, KY  
Locks & Dams Disposition  
Study
  - ▶ Navigation facilities at Lock and Dams 3-6 on the Green River, and 1 on the Barren River are no longer used for navigation.
  - ▶ Study is evaluating the possible deauthorization and disposal of the facilities, including impacts on existing water supply sources
  - ▶ Structural alterations will be required to ensure structural integrity and safety.

# Civil Works Program...*Flood Risk Management*

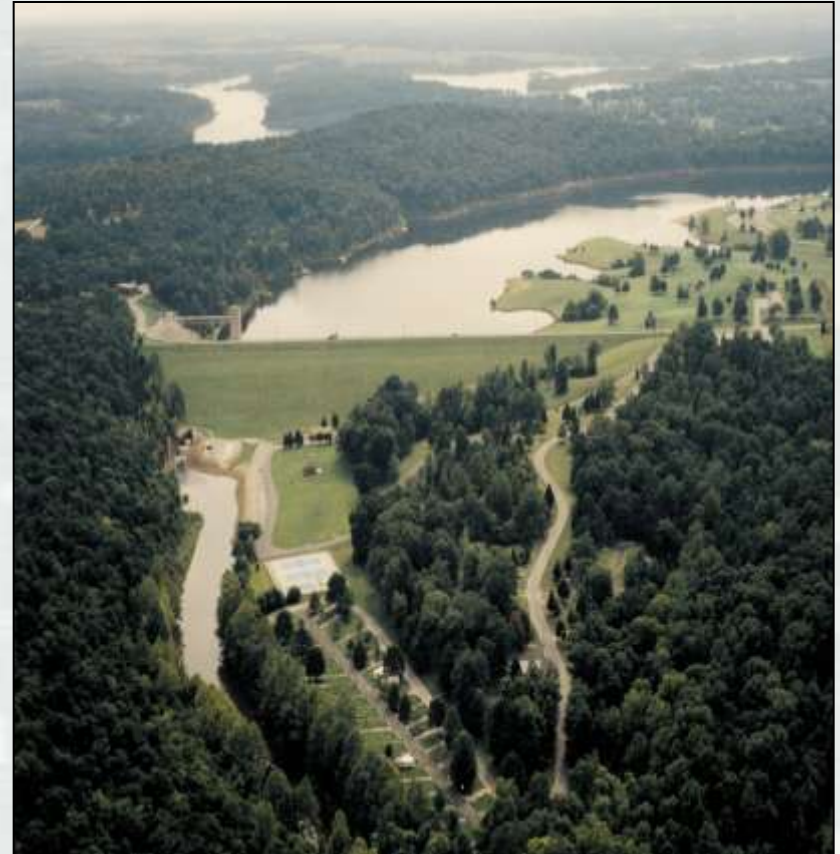

- Paducah, KY Reconstruction
  - ▶ Design underway
  - ▶ Total Project Cost - \$19M.
  - ▶ Rehabilitation of existing floodwall/levee, repair/replacement of pump station equipment, CMPs, concrete, and other appurtenant features.
- Indianapolis North
  - ▶ Ph 3B Levee complete
  - ▶ Supplemental EIS
  - ▶ PH 3A/3C Alteration complete
- Ohio River Greenway, IN
  - ▶ Clarksville/Jeff segment
  - ▶ New Albany segment
- Mill Creek, OH
  - ▶ Design of Remedial Repairs to Previously-Constructed Sections

# Civil Works Program...*Flood Risk Management*

- Dam Safety Special Studies
  - ▶ Rough River Dam, KY
    - Construction – Phase 1A  
Relocate State Hwy  
Award Date – March 2014
    - Design – Phase 1B  
Grouting Program
  - ▶ Patoka Lake Dam, IN
    - Phase 1 Issue Eval Study

# Civil Works Program...*Flood Risk Management*

- 2011 Levee Rehab Projects
  - ▶ Breevoort Levee
  - ▶ Wabash Levee Unit #5
  - ▶ Evansville Levee
  - ▶ Russell-Allison & Ambrew Levee
  - ▶ Paducah, Levee
  
- 2013 Levee Rehab Projects
  - ▶ Honey Creek Levee
  - ▶ Russell-Allison & Ambraw Levee
  - ▶ Breevoort Levee
  - ▶ Wabash Levee Unit #5
  - ▶ Gill Township Levee

# Civil Works Program...*Flood Risk Management*

- Continuing Authorities Program
  - ▶ New Albany, IN
    - Feasibility study of the South Fork of the Rolling Fork River
  - ▶ Delphi, IN
    - Feasibility study to address flooding within the Deer Creek watershed
  - ▶ Franklin, IN
    - Feasibility study to address flooding within the Young's Creek watershed
- Planning Assistance to States
  - ▶ Shepherdsville Stormwater—Bluelick Connector
    - Development of stormwater alternatives for the City of Shepherdsville

# Civil Works Program...*Flood Risk Management*

- Flood Plain Management Services
  - ▶ Franklin-Carlisle Floodway Study
    - Hydraulic Floodway analysis at various discharges to provide impact of removal of existing structures from the floodway
  - ▶ Muncie, IN, Flood Inundation Maps
    - H&H modeling for the development of a Flood Inundation map (FIM) library for Muncie, IN.

# Civil Works Program...*Ecosystem Restoration*

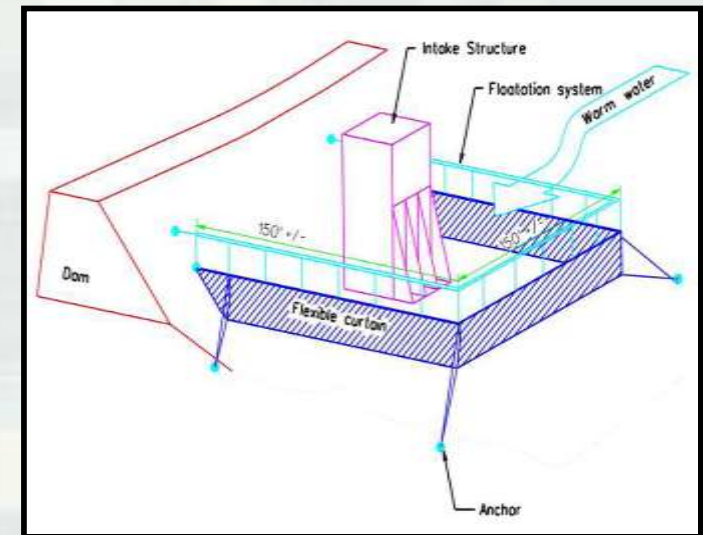

- Green River Watershed Assessment Study
  - ▶ Integrated Water Resources Management
  - ▶ Env Flow Assessments
  - ▶ Active River Analysis – Conservation Mapping
  - ▶ Identification of Requirements for Water Use Strategy
  
- Northern KY Riverfront Feasibility Study
  - ▶ 12 mile study area corridor on the left bank of the Ohio River from Bellevue to Newport
  - ▶ Restoration of the river corridor including compatible recreation features, and enhancement of public use and access to the river

# Civil Works Program...*Ecosystem Restoration*

- Continuing Authorities Program – Section 1135
  - ▶ Green River Dam Modification Study
    - Control Tower Modifications to enable greater control of water temperature during releases
  - ▶ Monroe Lake Moist Soil Management Study
    - Restoration of aquatic, wetland and riparian habitat adjacent to Monroe Lake

# Civil Works Program...*Recreation*

- Great Miami River Corridor Study
  - ▶ Study area extends from Sidney, OH through Dayton to Hamilton County
  - ▶ Planning Assistance to the Miami Conservancy District for river and riverfront recreation planning.
  
- Ohio Riverfront, Cincinnati, OH
  - ▶ Ph I and II construction complete
  - ▶ Ph III design complete
